

# How to make your field notebook

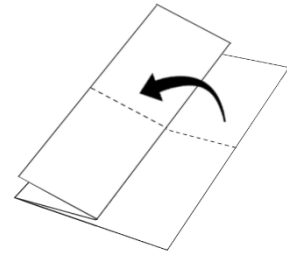

1. With the template print-side down, fold the page in half length ways

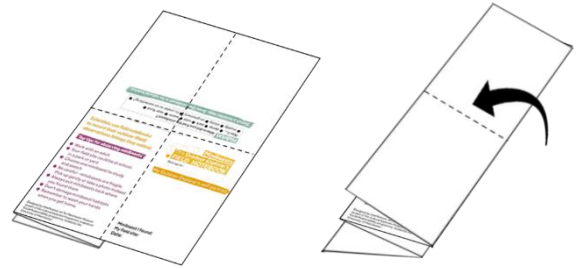

2. Unfold and then fold in half width ways

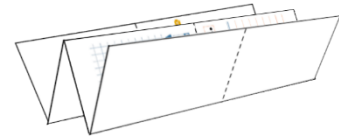

3. Fold the loose edge to the spine

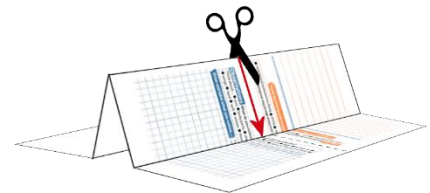

4. Flip over and repeat on the other side

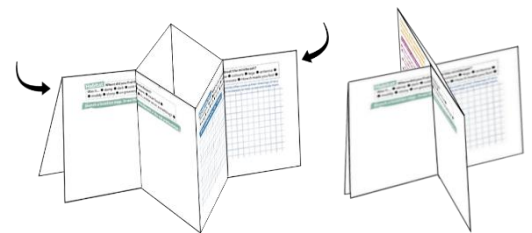

...unfold a little so you have a 'W' shape

5. Snip from the spine to the first folded line

6. Hands either side of the cut, pull the paper apart and downwards so you have a + shape

7. Now squish flat to make a small booklet
